On How the Lord Saved Us by Producing an Ideal Image

This is a writing about the time when the Lord
- saved us,
- opened our path,
- broadened our horizon,
- preserved us,
- helped us, and
- gave us salvation.

The Lord was anointed and distinguished for
- using and furnishing what was needed,
- loaning and lending what needed to be,
  - what ought to be, and
  - what should be, done.

The Lord was produced as an offspring of a loving vessel of producing change.

This loving vessel of change produced a multitude of people that produced an offspring of a sporting use of mockery and laughter.

This sporting use of mockery and laughter produced a confident strut, a walk of pride.

This way of walking with pride produced
- a way of tripping up those that opposed us,
- a way of restraining their growth, and
- a way of overtaking their powers.

This way of walking with pride and using mockery and laughter produced a way of waiting for an opportunity to catch the opponents off-guard and from the areas that they least expected.

This sportful mockery and laughter produced a way of throwing metaphorical stones and metaphorical arrows at our opponents to cause them to make confessions, and to be cast in the light from our an enlightened perspective.

This casting of enlightenment gave us power and caused us to be thankful for our wisdom and good fortune.

This sport of laughter and mockery which was produced from a loving vessel of change also produced other offspring from the same way of walking with pride.

These offspring formed a means
- of breaking apart the barriers that held us back,
- of spreading our type of people, and
- of a general rise in enlightened thinking.

From this breaking apart of the barriers, the spreading of our type of people, and from the general rise in enlightened thinking, we were all able to expand and stand upright from our previously bowed down positions of oppression.

This standing upright produced our ability to create a barrier and a fence which produced a yard or space for us to announce our presence and to play our song of enlightenment.

This ability to play our song and announce our presence produced a strength and a vigorous activity that lifted us up to loftier ambitions and promoted us to higher regions.

These loftier ambitions and higher regions produced a way of creating whisperings and prophesies from our experienced learning and diligent observations.

These prophesies and whisperings produced a pattern of enlightened people that wore the same garments of an ideal image.
